

In January 2008 Valley Medical Center, the only new “State of the Art” medical facility in the Hemet/San Jacinto Valley opened its doors for business to the residents of the valley. This twenty eight thousand square foot facility raises the standard of care available locally to the residents of San Jacinto and Hemet. Valley Medical Center is located at 1695 S. San Jacinto Avenue (next to the Regal Theaters and Family Sports & Fitness Center) and is anchored by a 5,000 square foot Urgi-Care/Family Practice and a 4,000 square foot Imaging Center.

The Urgi-Care is a more convenient and a quicker alternative to the long waits that Valley residents currently experience at Hemet Hospital. This Urgi-Care facility, benefits the entire community by providing the highest quality urgent care to Valley residents while relieving pressure at the hospital. The attending physicians at this state of the art Urgent Care/Family Practice are on call in Suite “A” to provide the highest level of emergency care for your family up to sixteen hours a day. Dr. Vidya Koka is the Medical Director of the Urgent Care/Family Practice who also specializes in Women’s Health.

San Jacinto Imaging offers the very latest in imaging technology in an impressive four thousand square foot facility. This noteworthy facility offers a CT (computerized tomography), and open MRI (magnetic resonance), digital x-ray, ultrasound, digital mammography and dexa screening with two expert radiologists on staff to read results. Each piece of equipment has been carefully selected to insure the highest quality technology available today. The digital imaging allows referring physicians to view immediately in their offices significantly reducing the time period patients have to wait for their results.

Dr. Allen Gustafson, a well respected and world renowned orthopedic surgeon brings his thriving practice to the first floor of the Valley Medical Center. Dr. Gustafson has dedicated himself to the pursuit of excellence in joint replacement and reconstruction.

The Rancho Physical Therapy, led by well known therapist Rey Aquino, provides a complete range of physical therapy services in suite “C/D”.

Lab Corp occupies Suite “J”, offering a complete array of laboratory services.

Dr. Wayne Kelly joined the Valley Medical Center in October 2009 specializing in Family Practice/Industrial Medicine/Worker Comps.

New Life Women's Health Care is headed by Tamsin Lewis, a Certified Midwife and registered nurse is in Suite "N".

Dr. Neal Simpson is a Family Medicine Specialist dedicated to providing exceptional primary care for all age groups is located in Suite "K".

Dr. Nagasamudra S. Ashok M.D. in Suite "F" provides Internal Medicine and Weight Loss Programs designed to each individual's lifestyle.

Dr. Richard Haas D.P.M. provides personalized podiatry services in Suite "H". Dr. Haas specializes in minimally invasive surgery, diagnosis and treatment of all foot and ankle problems.

Cardiovascular Consultants of the Inland Valley, Dr. George Ponce and Dr. Shadi Qasqas provide complete Cardio care.

Suites range from 338 to over 5000 square feet and can be built to accommodate each physician's exact needs with the latest technology. Valley Medical Center is designed for medical informatics use, including CAT 6 level connectivity and access to an array of contemporary electronic systems. Starting in 2010 all physician practices will be required to bill their services electronically in order to meet Medicare standards. In addition most physicians are already employing electronic medical record systems. Valley Medical Center has created a totally unique infrastructure to allow its tenants to meet these standards as well as future demands and to operate either fixed or WEB based clinical applications. It has constructed a HIPPA compliant, environmentally isolated and secure computer room. This allows the tenants to place their Electronic Medical Record application server in a controlled space to utilize the internet for WEB based EMR's. If the clinician does not have an EMR this is an option that will be made available, if required. The building also provides access to a technologically advanced high functionality. Valley Medical Center has internet services brought into the building over high speed lines, thus eliminating the need for individual offices to have their own internet service. Valley Medical Center can also provide to tenants, if required, a quality IT technical consultation by professionals who specialize in medical information services. All tenants get instantaneous access to the images and reports at the full service San Jacinto Imaging Center. Valley Medical Center is a building that has been designed to meet the electronic demands of today and well into the future.
